Ahmet Karaman, Accountable Manager
Turk Hava Yollari Teknik A.S
Sabiha Gokcen International Airport, Pendik
Istanbul, Turkey 34912

Dear Mr. Karaman:

Subject: FAA Certificate No. TQKY144F

The Dallas/Fort Worth International Field Office (DFW-IFO) has reviewed and accepted the Engine Test Cell Operations Manual dated October 18, 2019. Additionally, the initial correlation report for the test cell, which was performed by Pratt and Whitney and Snecma for the V2500 and CFM56, was sent to FAA Engineering for concurrence. Concurrence was received via email on October 25, 2019. Based on this, your engine test cell facility is considered FAA approved.

Please feel free to contact me by email at tonya.ellis@faa.gov or by phone at (214) 277-0307 if you have any questions.

Sincerely,

Tonya Ellis
Principal Maintenance Inspector
